

H-Series

With instant ozonated water, the H-Series enables fast, clean disinfection in the home kitchen. The H-Series replaces a number of chemical cleaners, providing easier to use and safer sanitation.

Uses for the H-Series are numerous and include hand sanitation, skin and oral care, food sanitation and sterilized oxygenated water for drinking.

The only by-product of ozone is oxygen and no chemicals are required to make it. There are no filters in the H-Series requiring ongoing replacement and maintenance is not required at least for the first 3 years, depending on use.

The H-Series ensures you no longer expose yourself or family to bacteria, chemicals or pesticides.

Hand Sanitation

Effectively kills 99,99% of all bacteria and viruses in 20 seconds. Also removes onion, garlic and other offensive odours from skin. No chemicals.

Skin and Oral Care

Eliminates bacteria from pores helping to reduce acne. Kills bacteria which causes bad breath and helps to reduce toothache and gum diseases.

Food Disinfection

Decomposes chemical residues & pesticides for better tasting produce. Eliminates bacteria and moulds maintaining freshness. Disinfects cutting implements.

Oxygenated Drinking Water

Drinking water free from chlorine and bacteria. Increased dissolved oxygen promotes numerous health benefits.

	ITEM	H-7110
Output	Ozonated Water Concentration	Max 4.0 ppm @ 0~20 sec / 1.5~4.0ppm @ 0-5 min
	Ozonated Water Output Capacity	150 +/-10% litres per hour
	Ozonated Water Output Pressure	0.1~0.3 kg/cm2 (1.4 ~ 4.3 psi)
	Oxygenated Water Concentration	20 +/- 5 ppm
	Oxygenated Water Output Capacity	120 +/- 10% litres per hour
Input	Input Water	Municipal Water
	Input Water Pressure	1.2 ~ 6.0 kg/cm2
	Input Water Temperature	5 ~ 35°C
Power Supply	AC Input	200 ~ 240 Volt, 50Hz
	Power Consumption	80W
Appearance	Dimension	330 x 176 x 435 mm (L x W x H)
	Weight	7.5kg
